Big Walnut Creek

Pavilion

Historic Truss Bridge

Hughes Road

Main Entrance

McCloud Nature Park opened in 2003 and features four distinct landscapes, a wetland habitat, Big Walnut Creek (perfect for swimming, fishing, canoeing, and kayaking), 6.5 miles of trails, an arboretum, a live honeybee observation house, a restored historic truss bridge, a Nature Center with interactive exhibits, a bird-watching area, plenty of photography opportunities, weekly family programs, and several festivals and special events across its 232 acres of natural beauty.
